A Display Of Wealth

Nevada has a celebrity that recently attempted to emulate Death Valley Scotty while on a visit to Los Angeles. He is supposed to have hailed from Goodhope, but the exact location of that camp is not shown on the maps of this state. Commenting upon the appearance of the celebrity, the Sacramento Union has the following:

"A fool and his money are soon parted." A man named "Bob" Leshar struck it rich over in Nevada; so rich that he is classed as a millionaire and was elected mayor Goodhope, and anyone can see that in order to have been picked out for popular approval he must have been rich.

Mayor Leshar went to Los Angeles the other day. He went wearing a sombrero, corduroys, high boots with the corduroys tucked therein, and with a couple of burros as traveling companions. In short, he went as the original wild and woolly man of the west. Says the report: "He actually created a mob scene when he threw \$1700 on the pavement for a grand scramble."

We suppose that Mayor Leshar had a good time but so, generally speaking, does any other fool when he parts with his money. All that he desired was to be seen and noticed, even if it was to be labeled an ass, and he had his desire. The people have seen him, noticed him, scrambled for his money, and labeled him as suggested. He ought to be happy in the conviction that he has made a spectacular donkey of himself, and probably he is, for that sort of notoriety is all that some men desire or can attain.

If Mayor Leshar had \$177 to give away there are a thousand and one methods by which he might have bestowed it where it would have done good, but to do good with it was not within his purview. He wished to be looked at, and he had the privilege, as he also might, had he listened, have had the privilege of hearing people say, "Who is this imbecile freak?"

Mayor Leshar now can afford to get right home again, for he can gratify himself for some time to come with the reflection that he is the most meteoric ass who has struck the angel city in many a day.

The Leasing System

Almost every time a mining company finds itself short of funds (and frequently at other times) it leases all or part of its territory to someone on a royalty basis, says the New York Mining Age. Almost every time a leaser finds a profitable shoot of ore a storm of criticism goes up from the shareholders in the mining company against the folly of letting some other fellow take out ore and keep some of the proceeds for himself.

If ever a man or a corporation earned what he got from a piece of work, the leaser earns his share. The leaser goes in where the company fears to tread. The leaser found the Mohawk ore shoot and made Goldfield a camp; the leaser has developed Cripple Creek and pulled Stratton's independence back from the brink of mining eternity to a sound footing of renewed productiveness, the leaser is making a mine under Peterson Lake in Cobalt. Our hats are off to him.

His success comes because he puts a piece of work ahead of him, takes off his coat, rolls up his sleeves and pitches in. His money and his energy go direct to the place where his judgment tells him they will do the greatest good. He will follow a mineralized stringer or a theory all over the lot until he reaches his goal or goes broke, and the fact that his nose is everlastingly following the scent, and his eye searching for signs of the trail, makes him oftentimes successful where the lordly mine manager would fail.

While the tollsome, slow and unexciting search is going on, the complacent shareholder sits back with folded hands and rejoices that his property is being developed at no cost to himself, and congratulates himself that 25 per cent of the output comes to him anyway, which, being all profit, is about as well as he could hope to do if he were doing the mining himself. But when the shipments go out and only a measly little 25 per cent comes into the erstwhile complacent shareholder—why, then is his cue to rail at the stupidity of the directorate that would squander the patrimony, etc., etc., etc.

Let us give the leaser his due. Were it not for him there would be fewer mines in the world, and goodness knows we need all we've got. When he succeeds, let us not grudge him his profits, but be glad instead that we are lucky enough to profit by someone else's brains and grit and money.

If the Mexican war only keeps up until the baseball season starts, the reading public will be enabled to secure sufficient news of an exciting nature to blaze the way for the squabbles with the umpire's decisions.

Hale's "Man Without a Country" and Senator Heffernan of Esmeralda could have traveled in the same boat.

IN PLACING YOUR DRUG TRADE

Don't let the fact of a drug store being handy overshadow your good judgment in buying. The nearby store may be a reliable store and it may not. Your own health and that of your family demand that you should know about the matter before you place your drug trade.

If ours is your nearby store we want you to investigate our methods and the quality of goods we sell. They'll stand the most searching investigation.

If we are at a distance it will pay you to look us up anyway. There are many reasons why placing your drug trade with us will be to your advantage. We deliver all goods free.

THE GILA MONSTER IS MUCH MALIGNED

Probably there is no other living creature more feared by the ignorant than the Gila monster, about which all manner of weird tales have been told. It has even been held that the mere breath of this animal is sufficient to cause death to the one upon whom it falls. Scientific inquiry, however, fails to disclose a single instance wherein the breath or even the bite of this creature has resulted fatally. The fact that dissection and microscopic examination do not reveal any trace of glands for the secretion of venom is sufficient evidence to indicate that this curious member of the lizard family has been slandered.

Some years ago a civil engineer in the southwest undertook to settle once for all the question whether the "monster" was deadly or not. A fine specimen was captured and confined in a wire inclosure. A chicken was obtained and its feathers were removed in order that the lizard might have every opportunity to strike at the breast. The chicken was then held quite close to the Gila monster, which soon snapped viciously and secured a firm hold on the fowl's breast, retaining this grip for more than 10 minutes. When the victim was released it was found that the chicken's breast bone had been broken. Nevertheless the fowl quickly recovered, the bone knitting and the wound healing with no symptoms of poisoning.

It is very probable that the reputation for evil borne by the Gila monster is due solely to its most repulsive appearance.—Harper's Weekly.

CAVE IN DRIFT CAUSES GROUND TO SETTLE

There were rumors yesterday of another bad cave at the Chollar company ground, but it proved to be somewhat exaggerated. An investigation showed that on B street, near the Haas residence, where there has been more or less of a depression, there is now a hole some three or four feet deep, but limited in circumference, caused no doubt by a cave in a drift runs years ago. It is between 75 and 100 feet northerly of any present workings of the Chollar Leasing company. The caved ground has been roped off, and as soon as it is through settling, the depression will be filled in.—Virginia Chronicle.

EATING NOT SO VERY HIGH AT ROCHESTER CAMP

HAM AND EGGS FOR 50C BUT NO MENTION IS MADE OF DOUGHNUTS

In the old days of '49 a bill of fare in the little town of Marysville created considerable comment. In our modern little town of Rochester is another bill of fare which creates favorable comment from the standpoint of reasonableness and the quality of food one secures. The following is a typical bill of fare in the newest of Nevada's mining camps.
